Dear Colleagues and Friends, dear Participants of ECM-30,

On behalf of the European Crystallography Association as well as the Swiss Society for Crystallography, it is our pleasure to welcome you to Basel on the occasion of the 30th European Crystallography Meeting, ECM-30, held from 28 August until 1 September 2016.

The Swiss Society of Crystallography was born in 1968 and connects scientists from all disciplines for which crystallography is important. Together with the European Programme Committee from the SIGs and GIGs of the ECA, we have set up an exciting programme with excellent and fascinating science. With a total of 50 half-day microsymbiosia and 16 keynote speakers, as well as two plenary lectures by Nobel Laureates Professor Ada Yonath and Professor Jean-Marie Lehn, a large number of hot topics from biology, chemistry, physics and mineralogy will be covered.

ECM-30 will be a four-day vibrant and intensive scientific meeting with many learning opportunities in every current aspect of crystallography. In addition, there will be a Young Crystallographers meeting, workshops and user meetings, lunch meetings, and a social programme, which will allow you all to meet, connect and exchange. **Do not miss out on the very first ever ECM-Science Slam**, which is organized on Tuesday evening together with the Bertaut prize ceremony. Check out also our satellite meetings as well as the conference excursion to the free electron laser SwissFEL at Paul Scherrer Institute.

Basel is a welcoming, active and enterprising city of open minded citizens who excel in business as well as in the arts, right at the Swiss-German-French border in the heart of Western Europe. The famous Basel mathematicians Bernoulli and Euler await you on the historical evening tour. In addition to the architecturally interesting campuses of some "big" pharmaceutical and chemical enterprises, world-renowned museums, like the Beyeler or the Vitra design museum, are ready to welcome you. Or join us Wednesday evening at the Conference Dinner at the Basel Zoo? Enquire ASAP at the registration desk if there are places left!

We thank also all the sponsors, exhibitors and science foundations for their support, our conference organizer Congrex Switzerland, all our volunteers and helpers as well as the organizers of previous ECMs, especially Zoran Štefanić for using and supporting his abstract submission system. And, last but not least, YOU for your participation, making this conference a success.

So, while you're here, please make sure to enjoy – at least for a short while – beautiful Basel and Switzerland.

Hoping to meet you all in person,

Jürg Schefer
