Focus Area Responsibles

Focus Area 1: Michael Hennig, leadXpro AG, Villigen, for SIG 1

Focus Area 2: Jürg Schefer, Paul Scherrer Institute Villigen,

for SIG 5, 11, 12

Focus Area 3: Piero Macchi, Berne, for SIG 2, SIG 3, SIG 4

Focus Area 4: Katharina M. Fromm, Fribourg, for SIG 7 and SIG 13

Focus Area 5: Radovan Cerny, Geneva, for SIG 6, SIG 8 and SIG 9

Welcome to Basel

Dear Colleagues and Friends, dear Participants of ECM-30,

On behalf of the European Crystallography Association as well as the Swiss Society for Crystallography, it is our pleasure to welcome you to Basel on the occasion of the 30th European Crystallography Meeting, ECM-30, held from 28 August until 1 September 2016.

The Swiss Society of Crystallography was born in 1968 and connects scientists from all disciplines for which crystallography is important. Together with the European Programme Committee from the SIGs and GIGs of the ECA, we have set up an exciting programme with excellent and fascinating science. With a total of 50 half-day microsymposia and 16 keynote speakers, as well as two plenary lectures by Nobel Laureates Professor Ada Yonath and Professor Jean-Marie Lehn, a large number of hot topics from biology, chemistry, physics and mineralogy will be covered.

ECM-30 will be a four-day vibrant and intensive scientific meeting with many learning opportunities in every current aspect of crystallography. In addition, there will be a Young Crystallographers meeting, workshops and user meetings, lunch meetings, and a social programme, which will allow you all to meet, connect and exchange. *Do not miss out on the very first ever ECM-Science Slam*, which is organized on Tuesday evening together with the Bertaut prize ceremony. Check out also our satellite meetings as well as the conference excursion to the free electron laser SwissFEL at Paul Scherrer Institute.

Basel is a welcoming, active and enterprising city of open minded citizens who excel in business as well as in the arts, right at the Swiss-German-French border in the heart of Western Europe. The famous Basel mathematicians Bernoulli and Euler await you on the historical evening tour. In addition to the architecturally interesting campuses of some "big" pharmaceutical and chemical enterprises, world-renowned museums, like the Beyeler or the Vitra design museum, are ready to welcome you. Or join us Wednesday evening at the Conference Dinner at the Basel Zoo? Enquire ASAP at the registration desk if there are places left!

We thank also all the sponsors, exhibitors and science foundations for their support, our conference organizer Congrex Switzerland, all our volunteers and helpers as well as the organizers of previous ECMs, especially Zoran Štefanić for using and supporting his abstract submission system. And, last but not least, YOU for your participation, making this conference a success.

So, while you're here, please make sure to enjoy – at least for a short while – beautiful Basel and Switzerland.

Hoping to meet you all in person,

Jürg Schefer Paul Scherrer Institut Katharina M. Fromm University of Fribourg

Scientific Programme - Introduction

The scientific programme of the ECM-30 is organised into the following microsymposia which are promoted by the Programme Committee, the Special Interest Groups (SIGs 1-13) and the General Interest Groups (GIG 1-2). Throughout the programme book the microsymposia are colour-coded according to their respective focus areas.

Focus Area 1 (SIG 1)

- SAXS in structural biology
- Development of new types of sample preparation (both XFEL & synchrotrons)
- Data collection and processing software (XFELS & synchrotrons)
- · New developments in phasing and refinement
- · Structural information in drug design
- Molecular machines and big complexes
- · Protein & glycobiology structure determination
- Membranes and membrane interacting proteins
- · Enzyme reactions and dynamics in crystals
- H-bonding & weak interactions in crystals: neutrons and X-rays
- Hybrid approaches and validation (X-ray and electron microscopy)
- · Biophysical characterization and crystallization
- · Hot structures in biology

Focus Area 2 (SIG 5, 11, 12)

- Biomineralogical crystallography and bioinspired inorganic materials
- · Minerals and materials
- Structure-property relationships in high pressure crystallography
- Crystal chemistry of C-bearing materials and minerals at extreme conditions
- Structural studies of meteoritic, extra-terrestrial, and planetary materials
- Solid state oxygen fuel cell, hydrogen storage & battery materials
- Materials for energy conversion and harvesting
- Structural disorder and materials' properties at ambient and nonambient conditions

Focus Area 3 (SIG 2, 3, 4)

- Beyond multipolar refinement
- · Charge and spin density of materials at extreme conditions
- · Inorganic and metal-organic magnetic structures
- Quasicrystal and approximant: structure and properties
- Incommensurate modulated and composite phases
- · Dynamical refinement of electron diffraction data
- · New approaches in electron crystallography

Scientific Programme – Introduction

Focus Area 4 (SIG 7, 13)

- · Molecular interactions in crystal packing and molecular assemblies
- Hydrogen bonding from theory to applications
- Crystal energy landscapes: computation and uses
- Polymorphs, cocrystals, solvates, salts: a jungle for scientists and industries
- Hot structures of small molecules
- Molecular recognition, supramolecular chemistry and crystal engineering
- · Simulation of dynamics in molecular compounds
- · Crystallography in solid state reactions and catalysis
- Molecular compounds and MOFs at ambient conditions and under high pressure
- Nanomaterials & graphene

Focus Area 5 (SIG 6, 8, 9)

- X-Ray diffraction on the µs to ps time scale
- New detectors for high energy X-ray applications
- The use of X-ray, electron and neutron scattering in nanoscience
- · Advances in neutron scattering under non-ambient conditions
- Combining X-ray diffraction and other techniques for in situ and operando studies
- Total scattering: pdf analysis and diffuse scattering in X-Ray, neutron and electron diffraction
- Measuring data quality
- · Computational tools for theoretical chemistry in crystallography

General Microsymposia

- Teaching & Education
- Crystallography in art and cultural heritage
- How to...: crystallization for small and large molecules
- History of ECA, history of crystallography: contributions to and of crystallography

The programme of the ECM-30 contains 2 plenary lectures, 16 keynote lectures and 50 microsymposia. The keynote talks are held typically at 08:30 and 16:30/17:30, the oral contributions of the microsymposia are running in 6 (7) parallel sessions, in the mornings from 10:00 – 12:00 and in the afternoons from 14:00 – 16:00. In each microsymposium there are five lectures, two invited lectures of 30 minutes and three 20 minute lectures selected from the abstracts.

Scientific Programme – Sunday, 28 August 2016

17:00 – 19:00	Opening Session
	Chairs: K. M. Fromm (Fribourg, CH) P. Macchi (Berne, CH)
17.00	Welcome by Congress Chair K. M. Fromm (Fribourg, CH)
17.10	Greetings from the authorities M. Dell'Ambrogio, State Secretary, State Department of Education, Research and Innovation (Berne, CH) HP. Wessels, Representative of Basel-City (Basel, CH)
17.35	Musical welcome by Solodurum (alphorne blower trio)
17.45	Welcome words M. Tanner, President of the Swiss Academy of Sciences (Berne, CH) P. Macchi, President of the Swiss Society of Crystallography (Berne, CH) J. Mesot, Director of the Paul Scherrer Institute (Villigen, CH) A. Bacchi, President of the European Crystallographic Association (Parma, IT)
18.15	Musical performance by Solodurum (alphorne blower trio)
18.20	9 th Max Perutz Prize of the European Crystallographic Association U. Heinemann, (Max Delbrück Center for Molecular Medicine, Berlin, DE)
18.25	On the fascinating way from abstract superspace theory to the practical structure analysis of modulated and composite crystals V. Patrick (Institute of Physics of the Czech Academy of Sciences, Prague, CZ), winner of the 9th Max Perutz Prize
	Followed by Welcome Reception within the industrial exhibition

	Sydney
08:30 - 09:30	Plenary Lecture Ada Yonath
	Chair: M. Hennig (leadXpro AG, Villigen, CH)
	Crystallography & Ribosomes, Antibiotics Resistance, Parasites, the Microbiome, Environmental issues, Origin of Life and More A. Yonath (Weizmann Institute, Jerusalem, IS)
	Rio
09:40 - 10:00	Commercial Presentation hosted
	by NanoTemper Technologies GmbH
	Easy and Rapid Analysis of Protein Stability, Quality and Aggregation by nanoDSF T. Pflüger (NanoTemper Technologies GmbH, Munich, DE)
09:30 - 10:00	Coffee break
	Focus Area 1 (SIG 1) Sydney
10:00 - 12:00	MS 7 Protein & glycobiology structure determination
	Chairs: J. Agirre (York Structural Biology Laboratory, UK) G. Sulzenbacher (CNRS, Marseille, FR)
10:00 MS7-01	Structures of lytic polysaccharide monooxygenases and their interaction with polysaccharide substrates L. Lo Leggio (Department of Chemistry, University of Copenhagen, DK)
10:30 MS7-O2	Membrane Enzymes: the Structural basis of Phosphatidylinositol Mannosides Biosynthesis in Mycobacteria M. Guerin (IKERBASQUE, Basque Foundation for Science, Bilbao, ES)
11:00 MS7-03	Structural studies of medically-interesting protease inhibitors and lectins that belong to the

β-trefoil family

11:20 MS7-04

11:40 MS7-05

catalytic diversity in the galactose oxidase family S. Urresti (Department of Chemistry, (University of York, UK) Structure of the factor H-sialic acid complex links sialic acid recognition to atypical hemolytic uremic syndrome and reveals a novel

A. Wlodawer (Center for Cancer Research, National

Cancer Institute, Frederick, MD, US)

Structure-function characterization reveals

conformation of the GM1 glycan B. Blaum (Interfaculty Institute of Biochemistry, University of Tübingen, DE)

		Focus Area 4 (SIG 7, 13)	Singapore
10:00	- 12:00	MS 36 Crystallography in solid s and catalysis	
		Chairs: K. Bučar (University College F. Lahoz (University of Zarag	
10:00	MS36-01	Designing single-crystal-to-single- Diels-Alder reactions: the role of r interactions D. Levendis (Molecular Sciences In of Chemistry, University of the Witw Johannesburg, ZA)	nonbonded stitute, School
10:30	MS36-02	The Emergence of Medicinal Mech T. Friscic (McGill University, Montre	
11:00	MS36-03	Last advances in <i>in situ</i> monitoring mechanochemical reactions by X-V. Ban (Paul Scherrer Institute, Villig	ray diffraction
11:20	MS36-04	Hindered reduction of NiO on Al co carriers studied by <i>in situ</i> L. Lundegaard (Haldor Topsøe A/S,	· ·
11:40	MS36-O5	In situ diffraction studies during tr catalysis C. Weidenthaler (Max-Planck-Institu Kohlenforschung, Mülheim an der I	ut für

Racemic DNA Crystallography: advantages and

applications P. Mandal (Université de Bordeaux, CBMN (UMR5248), Pessac, FR) 11:40 MS12-05 An all-in-one lanthanide complex to overcome the two major bottlenecks in protein crystallography. S. Engilberge (Institut de Biologie Structurale, Grenoble, FR) Focus Area 5 (SIG 6, 8, 9) Osaka MS 39 X-Ray diffraction on the µs to ps 10:00 - 12:00 time scale Chairs: M. Wulff (European Synchrotron Radiation Facility, Grenoble, FR) S. Gorfman (University of Siegen, DE) Time-resolved X-ray microdiffraction for 10:00 MS39-O1 ferroelectric heterostructures J.Y. Jo (Gwangji Institute of Science and Technology, KR) Laser driven acoustic vibrations in nanowires 10:30 **MS39-02** studied by time-resolved GIXD. D. Khakhulin (European XFEL GmbH and the Hamburg Centre for Ultrafast Imaging, DE) 11:00 MS39-03 Simulations of single-pulse Laue diffraction from proteins with radiation from synchrotron and XFEL sources V. Kabanova (European Synchrotron, Grenoble, FR) 11:20 MS39-04 Time-resolved photocrystallography on a laboratory diffractometer on the millisecond time scale D. Schaniel (Université de Lorraine, Vandoeuvreles-Nancy, FR) 11:40 MS39-05 X-ray study of femtosecond structural dynamics of the charge-density wave compound 1T-TaS, S. Ravy (Laboratoire de Physique des Solides, CNRS, Univ. Paris-Sud, Université Paris-Saclav, Orsay, FR) Focus Area 2 (SIG 5, 11, 12) Samarkand 10:00 - 12:00MS 15 Minerals and materials Chairs: F. Hatert (University of Liège, BE) R. Nilica (RHI-AG Technical Center Leoben, Vienna, AT) How crystallography can assist process 10:00 MS15-O1 mineralogy - two metallurgical examples V. Kahlenberg (University of Innsbruck, Institute of Mineralogy and Petrography, AT)

		O. Siidra (Saint-Petersburg State University, RU)	
11:00	MS15-03	Phase diagrams of Ba ₂ M ²⁺ Te ⁶⁺ O ₆ : insight into the interplay between crystal structure and magnetic dimensionality A. Gibbs (ISIS Pulsed Neutron and Muon Source, Rutherford Appleton Laboratory, Harwell Oxford, Ul	С
11:20	MS15-04	Crystal structure and polymorphism of NaSrVO ₄ the first A'B"X"O ₄ larnite related structure from X-ray powder data <i>G. Nenert (PANalytical B. V., EA Almelo, NL)</i>	.=
11:40	MS15-05	Ordering phenomena in minerals: the Verwey phase of natural magnetite G. Perversi (Centre for Science at Extreme Conditions and School of Chemistry, University of Edinburgh, UK)	
12.20	- 13:30	Sydno Commercial User Workshop hosted by Dectri	
12.30	- 13.30	Commercial Oser Workshop hosted by Decth	5
		Focus Area 1 (SIG 1) Sydno	еу
14:00	- 16:00	MS 10 H-bonding & weak interactions	
		in crystals: neutrons and X-rays	
		Chairs: B. Zakharov (Institute of Solid State Chemistry and Mechanochemistry SB RAS Novosibirisk, RU) A. Thompson (University of Oxford, UK)	S,
14:00	MS10-01	Nanoscale hydrogen bound network revealed by neutron scattering H. Bordallo (The Niels Bohr Institute - University o Copenhagen, DK)	
14:30	MS10-02	Molecular Interactions in Pharmaceutical Compounds K. Edkins (School of Medicine, Pharmacy and Health, Durham University, UK)	
15:00	MS10-03	High resolution neutron and X-ray diffraction RT studies of an H-FABP – Oleic acid complex: study of the internal water cluster and the ligand binding by a transferred multipolar electron density distribution A. Podjarny (IGBMC, CNRS, INSERM, UdS, Illkirch, FR)	t
15:20	MS10-04	Targeting transthyretin amyloidosis: Joint neutro and X-ray diffraction analysis of a pathogenic protein	n

A.W. Yee (Life Sciences group, Institut Laue-

Langevin, Grenoble, FR)

Scientific Programme - Monday, 29 August 2016

minerals

Crystal chemistry of layered Pb hydroxocarbonate

10:30 MS15-O2

15:40	MS10-05	Bond Formation, Interactions and Reactions in Peri-Substituted Naphthalenes. J. Wallis (School of Science and Technology, Nottingham Trent University, Clifton Lane, Nottingham, UK)
		Focus Area 4 (SIG 7, 13) Singapore
14:00	- 16:00	MS 34 Molecular recognition, supramolecular chemistry and crystal engineering
		Chairs: C.H. Görbitz (University of Oslo, NO)
		C. Massera (University of Parma, IT)
14:00	MS34-01	Sense and flexibility: self-assembly, host-guest chemistry and solid state dynamic behaviour of cyclic peptoids C. Tedesco (Università di Salemo, Dipartimento di Chimica e Biologia "A. Zambelli", Fisciano, IT)
14:30	MS34-02	Supramolecular chemistry of the p-carboxylatocalix[4]arenes S.J. Dalgarno (Heriot-Watt University, Riccarton, Edinburgh, UK)
15:00	MS34-03	Structural Layers in High-Z' Molecular Crystals C. Brock (University of Kentucky, US)
15:20	MS34-04	From versatile hydrogen- and halogen-bond acceptors to elastic bending of metal-containing architectures M. Dakovic (Department of Chemistry, Faculty of Science, University of Zagreb, HR)
15:40	MS34-05	Mechanisms of Guest Exchange and Selectivity in Host-Guest Systems L. Nassimbeni (University of Cape Town, ZA)
		Focus Area 3 (SIG 2, 3, 4) Darwin
14:00	- 16:00	MS 26 Incommensurate modulated and
		composite phases Chairs: M. Dusek (Institute of Physics of the Czech Academy of Sciences, Prague, CZ) A. Abakumov (Skolkovo Institute of Science and Technology, Moscow, RU)
14:00	MS26-O1	Incommensurate charge order and charge- density waves S. van Smaalen (University of Bayreuth, Laboratory of Crystallography, DE)
14:30	MS26-02	Incommensurate oxides and sulfides B. Stöger (TU Wien, AT)
15:00	MS26-03	Structural phase transitions in the organic-inorganic hybrid perovskites (C ₆ H ₁₁ NH ₃) ₂ [PbX ₄] (X=I, Br) S. Pillet (Laboratoire de Cristallographie, Résonance Magnétique et Modélisations, Institut Jean Barriol, Université de Lorraine, Vandœuvre-lès-Nancy, FR)

15:20	MS26-04	Probing the nuclear and magnetic structure of a complex ferromagnetic semiconductor <i>J. Claridge (University of Liverpool, UK)</i>	
15:40	MS26-05	Incommensurately modulated crystal structures of Cu ₃ Si C. Corrêa (Institute of Physics of the Czech Academy of Sciences, Prague, CZ)	
		Focus Area 5 (SIG 6, 8, 9) Boston	3
14:00	- 16:00	MS 42 Advances in neutron scattering	
		under non-ambient conditions	
		Chairs: S. Klotz (Pierre and Marie Curie University, Paris, FR) J. Kulda (TRIPLE AXIS SPECTROMETERS, Grenoble, FR)	
14:00	MS42-01	The role of oxygen packing in the structural transformations of oxide glasses A. Zeidler (Physics Department, University of Bath, UK)	,
14:30	MS42-02	Neutron Diffraction Studies of Gas Hydrates J. Loveday (SUPA, School of Physics and Astronomy and Centre for Science at Extreme Conditions, The University of Edinburgh, UK)	
15:00	MS42-03	Matrix transformation temperature in boron containing Co-Re alloys for high temperature ga turbine applications P. Strunz (Nuclear Physics Institute of the CAS, Res. CZ)	
15:20	MS42-04	Neutron Total Scattering of Crystalline Materials in the Gigapascal Regime C. Bull (ISIS Facility, STFC, Rutherford Appleton Lab, UK)	
15:40	MS42-05	Stroboscopic neutron powder diffraction at HRPT, SINO. D. Sheptyakov (Laboratory for Neutron Scattering and Imaging, Paul Scherrer Institute, Villigen, CH)	
		Focus Area 1 (SIG 1)	io
14:00	- 16:00	MS 2 Development of new types of sample	j
		preparation (both XFEL & synchrotrons)	

Scientific Programme - Monday, 29 August 2016

14:00 MS2-01 Fundamental Characterization of Liquid-Jet Sample Injectors for XFEL and Synchrotron Use R.B. Doak (Max-Planck-Institut fuer medizinische Forschung, Heidelberg, DE)

Villigen, CH)

Chairs: G. Evans (Diamond Light Source, Harwell, UK)
J. Standfuss (Paul Scherrer Institute,

29

Scientific Programme – Monday, 29 August 2016

14:30 MS2-02	Enabling time-resolved structural studies of biological macromolecules A. Pearson (Hamburg Centre for Ultrafast Imaging, University of Hamburg, DE)
15:00 MS2-03	Macromolecular Crystallography at SwissFEL I. Martiel (Paul Scherrer Institute, CH)
15:20 MS2-04	The newPin project: Towards a new sample holder standard for cryogenic macromolecular x-ray crystallography G. Papp (European Molecular Biology Laboratory, Grenoble Outstation, FR)
15:40 MS2-05	Structure determination of a membrane protein with data collected from micro-crystals in lipidic cubic phase at room temperature in low background CrystalDirectTM crystallization plates. T. Schneider (European Molecular Biology Laboratory, Hamburg, DE)
	General Microsymposia Osaka
14:00 - 16:00	MS 49 How to: crystallization for small
	and large molecules
	Chairs: A. Maloney (The Cambridge Crystallographic Data Centre, UK) A. Crochet (University of Fribourg, CH)
14:00 MS49-01	Crystallographic Data Centre, UK)
14:00 MS49-01 14:30 MS49-02	Crystallographic Data Centre, UK) A. Crochet (University of Fribourg, CH) Some Tricks for the Single Crystal Growth of Small Molecules B. Spingler (Department of Chemistry, University of
	Crystallographic Data Centre, UK) A. Crochet (University of Fribourg, CH) Some Tricks for the Single Crystal Growth of Small Molecules B. Spingler (Department of Chemistry, University of Zurich, CH) How to enhance the success of protein crystallization N. Chayen (Computational and Systems Medicine, Department of Surgery and Cancer, Faculty of Medicine, Imperial College London, UK)
14:30 MS49-02	Crystallographic Data Centre, UK) A. Crochet (University of Fribourg, CH) Some Tricks for the Single Crystal Growth of Small Molecules B. Spingler (Department of Chemistry, University of Zurich, CH) How to enhance the success of protein crystallization N. Chayen (Computational and Systems Medicine, Department of Surgery and Cancer, Faculty of Medicine, Imperial College London, UK) Toward the mitigation of growth rate dispersion through pretreatment of seed crystals A.K. Rajagopalan (Institute of Process Engineering, ETH Zurich, CH)

General formation

Focus Area 2 (SIG 5, 11, 12)

MS 18 Structures of minerals, planetary and carbon materials at earth and planetary conditions

Chairs: T. Boffa-Ballaran (University of Bayreuth, DE) M. Merlini (University of Milan, IT)

14:00 MS18-O1 Discovering new materials, minerals and phenomena with evolutionary algorithms
A. Oganov (Skolkovo Institute of Science and Technology, Russia, RU)

14:30 MS18-02 Super-deep diamonds and their mineral inclusions: an overview

F. Nestola (Department of Geosciences, University of Padova, IT)

15:00 MS18-O3 Water-rock interactions in carbonaceous chondrites: a meso to nanoscale study of alteration processes in an anoxygenic environment

A. Elmaleh (Institut de Minéralogie, de Physique des Matériaux et de Cosmochimie (UPMC-CNRS), FR)

15:20 MS18-04 Structures of meteoritic diamond nanocrystals
P. Nemeth (Institute of Materials and Environmental
Chemistry, Research Center for Natural Sciences,
Hungarian Academy of Sciences, Budapest, HU)

15:40 MS18-O5 Structural trend of alkaline carbonates under high pressure

P. Gavryushkin (V.S. Sobolev Institute of Geology and Mineralogy SB RAS, Novosibirsk, RU)

16:00 – 16:30 **Coffee break**

Sydney

16:30 – 17:30 **Keynote Lecture Peter Schurtenberger**

Chair: A. Stradner (Lund, SE)

Colloids in the spotlight – watching crystalcrystal transitions in real time and real space P. Schurtenberger (Lund University, SE)

Singapore

16:30 – 17:30 **Keynote Lecture Francesca Fabbiani**

Chair: M. Wörle (Zurich, CH)

Exploring crystalline molecular materials at high pressure

F. Fabbiani (Georg-August-Universität Göttingen, DE)

Scientific Programme – Monday, 29 August 2016

17:30 - 19:00	Poster Session 1
	MS [1, 2, 3, 4, 7, 9, 11, 13, 14, 15, 17, 19, 22, 24, 25, 26, 27, 28, 31, 32, 38, 41, 44, 46, 48]
	Sydney
19:00 – 20:00	Commercial User Workshop: Progress in Source and Detector Technology for X-ray Crystallography hosted by Bruker
	Chairs: R. Durst (Bruker, Karlsruhe, DE) J. Wiesmann (Incoatec, Geesthacht, DE)
19:00	Welcome to the future: The new D8 2nd Generation J. Wiesmann (Incoatec, Geesthacht, DE)
19:05	Microfocus made perfect: lμS 3.0 C. Michaelsen (Incoatec, Geesthacht, DE)
19:15	The new PHOTON II, XFEL detector technology in-house R. Durst (Bruker, Karlsruhe, DE)
19:30	D8 VENTURE with METALJET and NANOSTAR: One source – two instruments – best results V. Smith (Bruker, Karlsruhe, DE)
19:40	Synchrotron data quality in the home laboratory <i>M. Adam (Bruker, Karlsruhe, DE)</i>
19:50	Mastering challenging samples T. Stürzer (Bruker, Karlsruhe, DE)

Sydney

08:30 - 09:30 Keynote Lecture François Diederich

Chair: B. Giese (Fribourg, CH)

Molecular Recognition in Chemical and Biological Systems: A Multidimensional Approach F. Diederich (ETH Zurich, CH)

Singapore

Sydney

08:30 - 09:30 Keynote Lecture Birger Dittrich

Chair: P. Macchi (Berne, CH)

Emphasizing the difference between experimental and theoretical electron density in the solid state: new opportunities from anharmonic thermal motion to excited states

B. Dittrich (Heinrich-Heine University, Düsseldorf, DE)

09:30 - 10:00 **Coffee break**

10:00 - 12:00

Focus Area 1 (SIG 1)

MS 13 Hot structures in biology

Chairs: M. Jaskolski (A. Mickiewicz University.

Poznan, PL)
U. Heinemann (Max Delbrück Center for Molecular Medicine, Berlin, DE)

10:00 MS13-O1 How Bacteria Make Rocket Fuel: Structure and Mechanism of Hydrazine Synthase

T.R.M. Barends (Max Planck Institute for Medical Research, Heidelberg, DE)

10:30 MS13-02 Challenges at low resolution: crystal structure of the yeast VPS34 complex II.

N. Soler (MRC Laboratory of Molecular Biology, Cambridge, UK)

11:00 MS13-O3 X-Ray Crystal Structure of a Chromatosome
C. Davey (School of Biological Sciences, Nanyang
Technological University, 60 Nanyang Drive, SG)

11:20 MS13-04 Zinc dependent 3'-nucleases/nucleotidases from plants, fungi and bacteria – varied roles and specificity

J. Dohnalek (Institute of Biotechnology CAS, Biocev, Vestec, CZ)

11:40 MS13-05 Structure and dynamics of the polymyxinresistance-associated response regulator PmrA in
complex with the promoter DNA

C.-D. Hsiao (Institute of Molecular Biology, Academia Sinica, TW)

	Focus Area 1 (SIG 1)	Singapore
10:00 - 12:00	MS 3 Data collection and processing software (XFELS & synchrotrons)	1
	Chairs: A. Mancuso (XFEL, Hamburg, D T. Schneider (European Molecui Laboratory, Hamburg, DE)	
10:00 MS3-01	MX data analysis developments at Dia Source. G. Evans (Diamond Light Source, Harwe and Innovation Campus, Didcot, UK)	ŭ
10:30 MS3-02	Hidden treasure in serial femtosecond A. Barty (CFEL/DESY, DE)	diffraction
11:00 MS3-03	Processing XFEL Still Shots and Mergicrystal Data N. Sauter (Lawrence Berkeley National LUS)	
11:20 MS3-04	Data sets merging in serial crystallogra R. Warshamanage (Swiss Light Source, Scherrer Institute, Villigen, CH)	
11:40 MS3-05	Experimental phasing with serial crysta at XFEL and synchrotron radiation K. Yamashita (RIKEN SPring-8 Center, A Photon Technology Division, Sayo, JP)	0 . /
	Focus Area 3 (SIG 2, 3, 4)	Darwin
10:00 – 12:00	MS 27 Dynamical refinement of electron data	etron
	Chairs: R. Beanland (University of Warw M. Gemmi (Center for Nanotech Innovation, Pisa, IT)	
10:00 MS27-01	Structure refinement using precession diffraction tomography and dynamical theory L. Palatinus (Institute of Physics of the CCZ)	diffraction
10:30 MS27-02	Accurate unit cell determination from relectron diffraction data W. Wan (Bezelii Center EXSELENT on P. Materials and Inorganic and Structural Compartment of Materials and Environment Chemistry, Stockholm University, SE)	orous Chemistry,
11:00 MS27-03	Study of partial occupancies and Jahn distortions in (Na,□) ₅ [MnO ₂] ₁₃ by XRPD and electron diffraction dynamical refine E. Mugnaioli (Dipartimento di Scienze Fedella Terra e dell'Ambiente, Università a di Siena, Siena, IT)	Rietveld nements Fisiche,

Scientific P	rogramme – Tuesday, 30 August 2016
11:20 MS27-0	4 Localization of hydrogen atoms in organic molecules using dynamical refinement of electron diffraction data P. Brazda (Institute of Physics of the CAS, CZ)
11:40 MS27-0	5 Improving rotation electron diffraction data quality by data merging Y. Wang (Berzelii Center EXSELENT on Porous Materials and Inorganic and Structural Chemistry, Department of Materials and Environmental Chemistry, Stockholm University, SE)
	Focus Area 2 (SIG 5, 11, 12) Rio
10:00 - 12:00	MS 19 Solid state oxygen fuel cell, hydrogen storage & battery materials
	Chairs: B. Frick (Institut Laue-Langevin, Grenoble, FR) K. Edstroem (Uppsala University, SE)
10:00 MS19-O	 Structure and dehydration mechanism of the proton conducting brownmillerite Ba₂In₂O₅ M. Karlsson (Department of Physics, Chalmers University of Technology, SE)
10:30 MS19-0	2 In operando pair distribution function analysis and solid-state NMR studies of antimony anodes for sodium-ion batteries P. Allan (Diamond Light Source, Diamond House, Harwell Science & Innovation Campus, Didcot, Oxfordshire, UK)
11:00 MS19-O	• ,
11:20 MS19-0	

Characterization of cation ordering, oxygen vacancy distribution and proton sites in hexagonal and cubic BaTi1-xScxO3-δ P. Henry (European Spallation Source ERIC, Lund, SE)

11:40 MS19-05

Lattice dynamics of the ionic superconductor Li₄C_cO. Inelastic neutron scattering and Powder Averaged Lattice Dynamics (PALD) investigations. S. Rols (Institut Laue Langevin, Grenoble, FR)

Focus Area 4 (SIG 7, 13)

Osaka

10:00 - 12:00 MS 35 Simulation of dynamics in molecular compounds

> Chairs: M. Meuwly (University of Basel, CH) A.O. Madsen (University of Copenhagen, DK)

10:00 MS35-01 Lattice Vibrations in Molecular Crystals: Polymorphism and Phase Transitions J. Nyman (University of Southampton, UK)

Scientific Programme - Tuesday, 30 August 2016

10:30 MS35-O2 Diffuse scattering, spectroscopy and *ab initio* density functional theory

		M. Gutmann (Rutherford Appleton Laboratory, ISIS Facility, Chilton Didcot, Oxfordshire, UK)
11:00 M	IS35-03	Predicting Urea Crystal Shapes Grown from Solution with Molecular Dynamics Simulations Z. Bjelobrk (Institute of Process Engineering, ETH Zürich, CH)
11:20 M	IS35-04	Computational dehydration of an organic hydrate using molecular dynamics simulations A. Larsen (Department of Pharmacy, University of Copenhagen, DK)
11:40 M	IS35-05	The application of tailor-made force fields and molecular dynamics for NMR crystallography X. Li (Department of Pharmacy, University of Copenhagen, DK)
		Focus Area 5 (SIG 6, 8, 9) Samarkand
10:00 -	12:00	MS 44 Total scattering: pdf analysis and
		diffuse scattering in X-Ray, neutron and electron diffraction
		Chairs: V. Holý (Charles University in Prague, CZ)
		C. Giannini (Institute of Crystallography - CNR/IC, Bari, IT)
10:00 M	IS44-01	Confined liquid structure and chemical kinetics from total neutron scattering T. Youngs (ISIS Facility, STFC Rutherford Appleton Laboratory, UK)
10:30 M	IS44-02	Correlated disorder in relaxor ferroelectrics J. Hlinka (Institute of Physics, The Czech Academy of Sciences, Prague, CZ)
11:00 M	IS44-03	Mapping of reciprocal space with ferroelectrics under electric field D. Chernyshov (Swiss-Norwegian BeamLines at the European Synchrotron Radiation Facility, Grenoble, FR)
11:20 M	IS44-04	Pair Distribution Function calculated from electron diffraction data T. Gorelik (University of Mainz, DE)
11:40 M	IS44-05	Searching for Ti-clusters in Mg _{0.7} Ti _{0.3} thin film H. Kim (National Institute of Advanced Industrial Science and Technology, Tokyo, JP)
		Sydney
12:30 -	13:30	Commercial User Workshop hosted by Rigaku Oxford Diffraction
12:30		What's New in Chemical Crystallography at Rigaku Oxford Diffraction A. Griffin (Rigaku Oxford Diffraction, UK)

12:45	CrysAlisPro M. Meyer (Rigaku Oxford Diffraction, Wroclaw, PL)
13:15	What's New in Structural Biology at Rigaku Oxford Diffraction A. Criswell (Rigaku Oxford Diffraction, Houston, US)
14:00 – 16:00	Focus Area 4 (SIG 7, 13) Sydney MS 32 Polymorphs, cocrystals, solvates,
11.00	salts: a jungle for scientists and industries
	Chairs: M. Schmidt (University of Frankfurt, DE) C. Esterhuysen (University of Stellenbosch, Matieland, ZA)
14:00 MS32-O1	Thymine and Orotic Acid – small molecules with unusual hydrates and intriguing solid state phenomena
	D. Braun (Institute of Pharmacy, University of Innsbruck, AT)
14:30 MS32-02	Selection of Solid State Forms for New Chemical Entities: Challenges, Opportunities and Lessons C. Saal (Merck Group, Darmstadt, DE)
15:00 MS32-03	Pharma: improving and controlling properties. Cocrystals, bio-inspired MOFs and lonic Liquids. Gabapentine a case study. M.T. Duarte (Centro de Química Estrutural, Instituto Superior Técnico, Universidade de Lisboa, PT)
15:20 MS32-04	Traversing the solid form jungle using the power of the Cambridge Structural Database N. Feeder (The Cambridge Crystallographic Data Centre, UK)
15:40 MS32-05	In the jungle, the mighty jungle, the crystals grow tonight! U. Werthmann (Boehringer Ingelheim GmbH, DE)
	Focus Area 1 (SIG 1) Singapore
14:00 - 16:00	MS 4 New developments in phasing and refinement
	Chairs: E. Dodson (York Structural Biology Laboratory, UK) R. Read (University of Cambridge, UK)
14:00 MS4-01	Refinement without a model J. Agirre (York Structural Biology Laboratory, Department of Chemistry, University of York, UK)
14:30 MS4-02	New bulk-solvent models improves model-to- data fit and facilitates map interpretation P. Afonine (Lawrence Berkeley National Laboratory, Berkeley CA, US)

Scientific Programme - Tuesday, 30 August 2016

37

Scientific Programme - Tuesday, 30 August 2016

15:00	MS4-03	Fragon – rapid fragment-based molecular replacement H. Jenkins (York Structural Biology Laboratory,	
		Department of Chemistry, University of York, UK)	
15:20	MS4-04	BORGES_MATRIX: a tool to generate models to ab initio phasing and for structure interpretation M. Sammito (Georg August University of Göttingen, Dept. of Structural Chemistry, DE)	
15:40	MS4-05	Substructure determination from SAD data usi phase retrieval techniques P. Skubak (Faculty of Sciene, Leiden Institute of Chemistry, Biophysical Structural Chemistry, Leiden, NL)	ng
		Focus Area 5 (SIG 6, 8, 9)	win
14:00	- 16:00	MS 43 Combining x-ray diffraction and other	r
		techniques for in situ and operando studies	
		Chairs: F. Fauth (Cells, Barcelona, ES) H. Ehrenberg (Karlsruhe Institut of Technology, DE)	
14:00	MS43-01	Revealing Secrets of Lithium-Ion Battery Operation by Neutron Scattering M. Muehlbauer (Helmholtz-Institute Ulm for Electrochemical Energy Storage HIU Karlsruhe, L	D <i>E)</i>
14:30	MS43-02	New insight on structural and redox processes involved upon cycling of Na ₃ V ₂ (PO ₄) ₂ F ₃ , an attractive positive electrode material for Na-ion batteries T. Broux (CNRS, University of Bordeaux, Bordeaux)	1
		INP, Pessac, FR)	
15:00	MS43-03	In situ analysis of mechanochemical reactions using combined X-ray diffraction and Raman spectroscopy F. Emmerling (Bundesanstalt für Materialforschulund -prüfung, DE)	ng
15:20	MS43-04	Operando Study of Ceria Based Solid Oxide Electrochemical Cells C. Dejoie (ESRF - The European Synchrotron, Grenoble, FR)	
15:40	MS43-05	Combined measurements of atomic displacements, lattice strain and macroscopic polarization in ferroelectrics S. Gorfman (University of Siegen, Department of Physics, DE)	r

General formation

14:00 – 16:00 MS 20 Materials for energy conversion and harvesting

Focus Area 2 (SIG 5, 11, 12)

Chairs: M. Hinterstein (Karlsruher Institut für Technologie (KIT), Eggenstein-Leopoldshafen, DE) S. Schmid (The University of Sydney, AU)

14:00 MS20-O1 A structural perception about intrinsic point defects in kesterite type compound semiconductors

S. Schorr (Helmholtz-Zentrum Berlin für Materialien und Energie, DE)

14:30 MS20-02 Application of Total Scattering Methods to the Investigation of Clean Energy Materials

L. Malavasi (University of Pavia and INSTM, IT)

15:00 MS20-03 Interaction of water with (silico)
aluminophosphate zeotypes: A comparative
investigation using dispersion-corrected DFT
M. Fischer (Fachgebiet Kristallographie, FB
Geowissenschaften, Universität Bremen, DE)

15:20 MS20-04 TiO₂ nanocontainers and nanospheres as photocatalysts for CO₂ reduction and photoelectrochemical water splitting: Structural modification.

> N. Hérault (Departement für Chemie und Biochemie, University of Fribourg, Berne, CH)

15:40 MS20-05 Structure and magnetocaloric properties of Gadolinium borohydrides

P. Schouwink (University of Geneva, CH)

Focus Area 3 (SIG 2, 3, 4)

Osaka

14:00 – 16:00 **MS 28 New approaches in electron** crystallography

Chairs: L. Meshi (Ben-Gurion University of the Negev, Beer-Sheva, IL) X. Zou (Stockholm University, SE)

14:00 MS28-01 When Precession Electron Diffraction
Tomography goes dynamical
P. Boullay (Laboratoire de Cristallographie et de
Sciences des Matériaux (CRISMAT), ENSICAEN, FR)

14:30 MS28-02 MicroED: Three Dimensional Electron Diffraction of Microscopic Crystals

T. Gonon (Group Leader, Howard Hughes Medical)

T. Gonen (Group Leader, Howard Hughes Medical Institute, Janelia Research Campus, Ashburn, US)

15:00 MS28-03 Protein nano-crystallography using optimized quantum area direct electron detectors like the Medipix and Dectris families.

E. van Genderen (Paul Scherrer Institute - LBR, CH)

Scientific Programme - Tuesday, 30 August 2016

15:20 MS28-04 Serial snapshot crystallography using electron diffraction S. Smeets (Inorganic and Structural Chemistry) Department of Materials and Environmental Chemistry, Stockholm University, SE) 15:40 MS28-05 Fast electron diffraction tomography on beam sensitive materials at room temperature: pharmaceuticals and zeolites M. Gemmi (Center for Nanotechnology Innovation @NEST, Istituto Italiano di Tecnologia, Pisa, IT) General Microsymposia Samarkand 14:00 - 16:00 MS 47 Teaching & Education Chairs: H. Flack (University of Geneva, CH) H. Stoeckli-Evans (University of Neuchâtel, CH) 14:00 **MS47-01** It is never too early, or too late to start E. Boldyreva (Novosibirsk State University, RU) 14:30 **MS47-02** A cross-field perspective on Symmetry & Crystal to introduce Crystallography J.-L. Hodeau (Institut Neel, CNRS & Univ. Grenoble Alpes, FR) 15:00 MS47-03 The power of using 827,948 crystal structures in education S. Ward (The Cambridge Crystallographic Data Centre, UK) Improved access to raw diffraction data and 15:20 **MS47-04** its impact on crystallographic education and teaching J. Helliwell (School of Chemistry, University of Manchester, UK) The educational and outreach programme of 15:40 **MS47-05** the IUCr M. Zema (International Union of Crystallography, Chester, UK) 16:00 - 16:30 Coffee break Sydney 16:30 - 17:30 Keynote Lecture Sandra W. Jacob Chair: T. Schirmer (Basel, CH) Allosteric Kinase Inhibitors S. W. Jacob (Novartis Pharma AG. Basel, CH)

General formation

16:30 – 17:30 **Keynote Lecture Marcus Neumann**

Scientific Programme – Tuesday, 30 August 2016

Chair: M. Meuwly (Basel, CH)

Organic crystal structure prediction – from fundamental research to industrial application M. Neumann (Avant Garde Materials Simulation Deutschland GmbH, Freiburg, DE)

17:30 – 19:00 **Poster Session 2**

MS [5, 6, 8, 10, 12, 16, 18, 20, 21, 23, 29, 30, 33, 34, 35, 36, 37, 39, 40, 42, 43, 45, 47, 49, 50]

Sydney

Singapore

19:00 – 20:30 The Bertaut Prize Ceremony and Science Slam

19:00 Science Slam

For the first time, a Science Slam will be held at a ECM-meeting! From all submitted poster abstracts, the Scientific Committee will chose 5-6 highly attractive themes (upon abstract submission, you can chose to be willing to do a science slam if your abstract is chosen) and contact the authors in order to ask them to deliver a 3-minutes presentation of their work. This should be such that a large public can understand it, and entertaining science is very welcome. The winner will be determined by the public with the help of an applaudimeter and will receive a special prize.

19:45 Introduction to the Bertaut-Prize

U. Heinemann (Max Delbrück Center for Molecular

Medicine, Berlin, DE)

20:00 Solving problems leads to solving crystal

structures

L. Reinhard (Department of Cell and Molecular

Biology, Karolinska Institute, SE)

	Sydney
08:30 - 09:30	Keynote Lecture Jan Pieter Abrahams
	Chair: B. Spingler (Zurich, CH)
	Electron nanodiffraction for structural biology J.P. Abrahams (Biozentrum University of Basel, CH)
	Singapore
08:30 - 09:30	Keynote Lecture Simon Parsons
	Chair: A. Linden (Zurich, CH)
	Understanding the diving forces of phase transitions in molecules S. Parsons (University of Edinburgh, UK)
09:30 - 10:00	Coffee break
	Focus Area 4 (SIG 7, 13) Sydney
10:00 - 12:00	MS 38 Nanomaterials & graphene
	Chairs: M. Woerle (ETH, Zürich, CH) A. Gil-Mestres (University of Lisbon, PT)
10:00 MS38-O1	Shape, Chemical and Crystalline Structure of Nanocrystals and their Impact on the Supercrystal Structure of Colloidal Superlattices R. Lechner (Institut fuer Physik, Montanuniversitaet Leoben, AT)
10:30 MS38-O2	Layered and 2D materials: electronic properties and structural instabilities from first principles P. Ordejón (Institut Català de Nanociència i Nanotecnologia - ICN2, The Barcelona Institute of Science and Technology and CSIC, ES)
11:00 MS38-O3	Preferred orientation of Li ⁺ diffusion in nano- LiMnPO ₄ N.H. Kwon (University of Fribourg, Chemistry department, Fribourg, CH)
11:20 MS38-04	X-ray studies on polymers and composites: the combination of 2D WAXS, SAXS and X-ray imaging techniques A. Neels (Center for X-ray Analytics, Empa, Dübendorf, CH)
11:40 MS38-05	Nano- x-ray fluorescence of individual GaAs/ InGaAs/GaAs core-shell nanowires grown by molecular beam epitaxy on silicon (111) A. Al Hassan (Naturwissenschaftlich- Technische Fakultät der Universität Siegen, DE)

	Focus Area 1 (SIG 1)	Singapore
10:00 - 12:00	MS 11 Hybrid approaches and valida	ation
	(X-ray and electron microscopy)	
	Chairs: F. Rey (Pasteur Institute, FR) M. Botte (leadXpro AG, Villigen,	СН)
10:00 MS11-01	How reliable are atomic models based cryo-EM reconstructions? Improvemen fitting and validation. P. Neumann (Department of Molecular & Biology, Institute for Microbiology & Ger GZMB, Georg-August-Universität Göttin	ts in model Structural netics
10:30 MS11-02	Cholesteryl esters are a new class of lipid antigen presentation by CD1c pro I. Tews (Centre for Biological Sciences, Life Sciences B85, University of Southanties)	teins Institute for
11:00 MS11-03	Structure of the full-length VEGFR-1 e domain in complex with VEGF-A S. Markovic-Mueller (leadXpro AG, PAR innovAARE, Villigen, CH)	
11:20 MS11-04	Protein-ligand interaction energy for crystallographic model building and va D. Beshnova (Hamburg Outstation, Euro Molecular Biology Laboratory, DE)	
11:40 MS11-05	DipSpace and DipCheck: A Distance G Based Description of Protein Main-Cha Conformation J. Pereira (EMBL Hamburg, DE)	
	Focus Area 2 (SIG 5, 11, 12)	Darwin
10:00 - 12:00	MS 21 Structural disorder and mater	rials'
	properties at ambient and non-ambie	ent
	conditions	
	Chairs: D. Chernyshov (Swiss-Norwegia BeamLines at the European Synd Radiation Facility, Grenoble, FR) V. Gavin (European Synchrotron Facility, Grenoble, FR)	chrotron
10:00 MS21-01	Lattice dynamics and elastic properties thermal diffuse scattering	from

B. Wehinger (Laboratory for Neutron Scattering and Imaging, Paul Scherrer Institute, Villigen, CH)

3D Single Crystal Diffuse Scattering -

Measurement and Interpretation H.-B. Bürgi (Department of Chemistry and Biochemistry, University of Berne, CH)

10:30 MS21-02

11:00	MS21-03	Guest – induced polymorphism and quenching of disorder in the Hofmann spin-crossover compound Fe(Pz)Pt(CN) ₄ studied by <i>in-situ</i> powder diffraction. C. Besnard (Laboratoire de cristallographie, University of Geneva, CH)
11:20	MS21-04	Structural disorder in spinel-like nanoparticles probed by total scattering A. Cervellino (Swiss Light Source, Paul Scherrer Institut, Villigen, CH)
11:40	MS21-05	Local order in cadmium cyanide. A. Simonov (Oxford University, UK)
		Focus Area 1 (SIG 1) Rio
10:00	- 12:00	MS 5 Structural information in drug design
		Chairs: M. Hennig (leadXpro AG, PARK INNOVAARE, Villigen, CH) V. Mikol (Sanofi, Paris, FR)
10:00	MS5-01	Structural elucidation of ligand binding sites in family B GPCRs and their application in drug discovery A. Jazayeri (Heptares Therapeutics Ltd, Hertfordshire, UK)
10:40	MS5-02	Crystal structures of the human doublecortin C-terminal and N-terminal domains in complex with specific antibodies A. Ruf (Roche, Pharma Research and Early Development (pRED), Basel, CH)
11:00	MS5-03	Combining "dry" co-crystallization with in situ diffraction to facilitate ligand screening by X-ray crystallography G. Labesse (CNRS, Université de Montpellier, Centre de Biochimie Structurale, FR)
11:20	MS5-04	Crystal structure of HDAC6: insights into molecular assembly, selective inhibition and microtubule deacetylation H. Gut (Friedrich Miescher Institute for Biomedical Research, Basel, CH)
11:40	MS5-O5	Probing nucleotide-induced conformational changes and interaction studies of the GTPase EngA C. Tomé (Institut de Biologie Structurale, Grenoble, FR)

Osaka

	* *
10:00 - 12:00	MS 48 Crystallography in art and
	cultural heritage

General Microsymposia

Chairs: A. Rafalska-Lasocha (Faculty of Chemistry Jagiellonian University, Krakow, PL) H. Stoeckli-Evans (Institute of Physics, University of Neuchâtel, CH)

10:00 MS48-01 MAKING GOLD: Recent Developments and New Perspectives

A. Zürn (Artist Researcher based in Biel, CH)

- 10:30 MS48-02 Micro-XRPD, XRPD tomography and MA-XRPD: three related methods to better understand structural alterations in cultural heritage materials K. Janssens (University of Antwerp, Department of Chemistry, BE)
- 11:00 MS48-O3 Crystallographic interpretation of mineral decompositions via Rietveld refinement strategy for clustering ancient ceramics

 M. Emami (Department of conservation and

M. Emami (Department of conservation and archaeology, Art University of Isfahan, Isfahan, IR)

11:20 MS48-04 Provenancing of clay-based pigments in paints using quantitative X-ray micro-diffraction analysis P. Bezdicka (Institute of Inorganic Chemistry of the CAS, Husinec-Rez, CZ)

Focus Area 5 (SIG 6, 8, 9)

Samarkand

10:00 – 12:00 **MS 46 Computational tools for theoretical** chemistry in crystallography

Chairs: M. Winn (Science and Technology Facilities Council, Swindon, UK) M. Lutz (Utrecht University, NL)

- 10:00 MS46-01 Recent Advancements in the Development of X-ray Constrained Wave Function Strategies

 A. Genoni (CNRS & Université de Lorraine, FR)
- 10:30 MS46-O2 Synergistic 'Substrate Activation' and 'Oxygen Activation' in Salicylate Dioxygenase from QM/ MM Simulations

J. Keastner (University of Stuttgart, Institute for Theoretical Chemistry, DE)

11:00 MS46-03 Topological collections and knowledge bases for applications in crystal engineering of coordination compounds

E. Alexandrov (Samara Center for Theoretical Materials Science, Samara State Aerospace University named after academician S.P. Korolyev (National Research University, RU)

Scientific Programme - Wednesday, 31 August 2016

Harnessing the power of the Cambridge Structural 11:20 **MS46-04** Database in your own way: the CSD Python API A. Maloney (The Cambridge Crystallographic Data Centre, UK) 11:40 MS46-05 An Enhanced Hirshfeld Test - Validating Atomic Vibrations in Crystal Structures J. Luebben (Heinrich-Heine-University Duesseldorf, DFI Focus Area 1 (SIG 1) Sydney 14:00 - 16:00 MS 6 Molecular machines and big complexes Chairs: M. Coll (Molecular Biology Institute of Barcelona (IBMB), Barcelona Science Park cl Baldiri. ES) C. Müller (European Molecular Biology Laboratory (EMBL), Heidelberg, DE) Fuzzy Sarcomeric Z-disk Complex: α-Actinin-FATZ 14:00 MS6-01 K. Djinovic-Carugo (Department of Structural and Computational Biology, Max F. Perutz Laboratories, University of Vienna, AT) Macromolecular machines in genome 14:30 MS6-02 maintenance T. Nicolas (Friedrich Miescher Institute for Biomedical Research Basel, CHI 15:00 MS6-O3 The Architecture of Fully Reducing Polyketide Synthases D. Herbst (Department Biozentrum, University of Basel, CH) 15:20 MS6-04 Crystal structure of the 239 kDa nuclear export complex CRM1 - RanGTP - Snurportin1 -Nup214 - MBP R. Ficner (Department of Molecular Structural Biology, Institute for Microbiology and Genetics. GZMB, Georg-August-University Göttingen, DE) 15:40 MS6-05 Cooperative Motion Analysis of group II chaperonins at single molecule level using nanocrystal and time-resolved diffraction measurement H. Sekiguchi (Japan Synchrotron Radiation Research Institute, JP)

Science, University of Stellenbosch, Matieland, ZA)

Supramolecular reactivity in the solid state: 15:20 **MS30-04** Step-wise assembly of ternary cocrystals through hydrogen and halogen bonding F. Topić (Department of Chemistry, Nanoscience) Center, University of Jyväskylä, FI) Hydrogen-bonded cocrystals of the drug 15:40 MS40-05 metformin: From molecular interactions analysis to supramolecular synthesis and characterization of Met-bis(DCA), a pharmaceutical cocrystal with enhanced anti-leukemic activity P. Gilli (Department of Chemical and Pharmaceutical Sciences and Centre for Structural Diffractometry, University of Ferrara, IT) Focus Area 2 (SIG 5, 11, 12) Rio 14:00 - 16:20 MS 14 Biomineralogical crystallography and bioinspired inorganic materials Chairs: W. Schmahl (University of Munich, DE) L. Fernandez-Díaz (Institute of Geosciences) (UCM, CSIC), Madrid, ES) 14:00 **MS14-01** Learning from Sea Shells - Bio-Inspired Approaches Toward Mesoscale Architectures in Functional Spinel Oxides A. Schenk (Institute of Polymer Chemistry, University of Stuttgart, DE) Complex biomimetic self-assembly in simple 14:30 **MS14-02** inorganic precipitation systems M. Kellermeier (Material Physics, BASF SE, DE) Biomimetic formation of calcite in intermixed 15:00 **MS14-03** gelatin/agarose hydrogels: Aggregate co-orientation and Mg content X. Yin (Department für Geo- und Umweltwissenschaften, Ludwig-Maximilians-Universität, Munich, DE) Polar ordering of macromolecular chains in 15:20 MS14-O4 biomimetic composite materials and natural M. Sommer (Department of Chemistry and Biochemistry, University of Bern, Bern, CH) BioMOFs: are we getting alternative carriers for 15:40 MS14-O5 improved drug storage and release? S. Quaresma (Centro de Química Estrutural, Instituto Superior Técnico, Universidade de Lisboa, Lisbon, PT) 16:00 **MS14-06** Energy dispersive white beam diffraction: Translating photon energy into the 3rd dimension for one-shot texture analysis H. Lichtenegger (Institute of Physics and Materials Science, University of Natural Resources and Life Science, Vienna, AT)

such as thermal diffuse scattering

R. Herbst-Irmer (Institute of Inorganic Chemistry, Georg-August-University Göttingen, DE)

Scientific Programme - Wednesday, 31 August 2016

MS45-04 Background modelling in the presence of ice rings 15:20 J. Parkhurst (Diamond Light Source, UK) At home accurate XRD measurements with an 15:40 **MS45-05** hybrid pixel X-ray detector: a comparison with CCD, APS-CMOS commercial detectors and theoretical model C. Lecomte (Université de Lorraine, FR) 16:00 - 16:30 Coffee break Sydney 16:30 - 17:30 **Keynote Lecture Makoto Fujita** Chair: J. Bernstein (New York University, Abu Dhabi, AEI Crystalline Sponge Method for Absolute Structure Determination M. Fujita (University of Tokyo, JP) Singapore 16:30 - 17:30 **Keynote Lecture Olivier Thomas** Chair: U. Pietsch (Siegen, DE) Mechanical properties of nanostructures in the light of synchrotron radiation O. Thomas (Marseille, FR) Sydney 17:30 - 18:30 **Keynote Lecture Robert von Dreele** Chair: R. Cerny (Geneva, CH) Structure solution GSAS-II R. von Dreele (Argonne National Laboratory, US) Singapore 17:30 - 18:30 **Keynote Lecture Petra Fromme**

Chair: C. Besnard (Geneva, CH)

Time-resolved femtosecond crystallography opens a new era in Structure Biology

P. Fromme (Arizona State University, Tempe, US)

08:30 - 09:30 **Keynote Lecture Werner Paulus**

Chair: J. Schefer (Villigen, CH)

Transition metal oxides: from structural complexity and topotactic oxygen diffusion pathways to energy applications W. Paulus (University of Monpellier, Montpellier, FR)

Singapore

08:30 - 09:30 Keynote Lecture Bob Cernik

Chair: A. Dommann (St. Gallen, CH)

X-ray colour diffraction imaging

B. Cernik (The Mill-B10b School of Materials, Manchester, UK)

09:30 - 10:00 **Coffee break**

Focus Area 1 (SIG 1) Sydney

10:00 – 12:00 MS 9 Enzyme reactions and dynamics in crystals

Chairs: G. Schneider (Karolinska Institut, Stockholm, SE)

A. Pearson (University of Hamburg, DE)

10:00 MS9-01 Single Crystal Serial Crystallography to Capture Redox Enzyme Catalysis and Dynamics

M. Hough (School of Biological Sciences,

University of Essex, Wivenhoe Park, Colchester, UK)

10:30 MS9-02 Time-Resolved Serial Femtosecond

Crystallography On Photoswitchable Fluorescent Proteins

M. Weik (Institut de Biologie Structurale, Grenoble, FR)

11:00 MS9-03 Changes in metal coordination are required to regulate activity of bacterial phosphodiesterases, implicated in c-di-GMP regulated biofilm dispersal

A. Hutchin (Centre for Biological Sciences, University of Southampton, UK)

11:20 MS9-O4 pH Dependent conformational change of bound maltose observed in the crystal of β -amylase at room temperature.

B. Mikami (Kyoto University, JP)

11:40 MS9-05 Lipidic cubic phase injector is a viable crystal delivery system for time-resolved serial crystallography

P. Nogly (Laboratory for Biomolecular Research,

Paul Scherrer Institute, Villigen, CH)

	Focus Area 4 (SIG 7, 13)	Singapore
10:00 - 12:00	MS 33 Hot structures of small mo	lecules
	Chairs: A. Roodt (University of the Fre Bloemfontein, ZA) M. Đaković (Ruđer Bošković Ir Zagreb, HR)	
10:00 MS33-01	How to fill MOFs with different flavo A. Bacchi (Dipartimento di Chimica, L Parma, IT)	
10:30 MS33-O2	Solid-state transition-metal photoact - tracing structure-property relations combined spectroscopic and crystall approaches K. Jarzembska (Biological and Chemic Centre, Department of Chemistry, Univ Warsaw, PL)	hips via ographic cal Research
11:00 MS33-03	Structural differences in enantiopure racemate organometallic complexes to [(η ⁵ -C ₅ Me ₅)RhCl(PN)] ⁺ⁿ complexes F. Lahoz (Institute for Chemical Synthe Homogeneous Catalysis (ISQCH), CSt University of Zaragoza, ES)	Application s esis and
11:20 MS33-04	Expanding the horizons of sky blue nitrosocarboranes G. Rosair (Institute of Chemical Science Watt University, Edinburgh, UK)	ces, Heriot
11:40 MS33-05	Silolyl-FeCp complexes: is there a waterrocene? P. Bombicz (Institute of Organic Chem. Research Centre for Natural Sciences, Academy of Sciences, Budapest, HU)	nistry,
	Focus Area 1 (SIG 1)	Darwin
10:00 - 12:00	MS 1 SAXS in Structural Biology	
	Chairs: D. Svergun (European Molecu Laboratory, Hamburg, DE) B. Vestergaard (University of C DK)	
10:00 MS1-01	Disentangling Structural Heterogene Disordered Biomolecular Complexes P. Bernadó (Centre de Biochimie Struc Montpellier, FR)	
10:30 MS1-O2	Enzyme dynamics visualized by SAX D. Albesa-Jové (Structural Biology Un- bioGUNE, Derio, ES; IKERBASQUE, Ba Foundation for Science, Bilbao, ES)	it - CIC
11:00 MS1-03	From size exclusion to HIS-tags: Incl sample purity for BioSAXS M. Brennich (ESRF-The European Syn Grenoble, FR)	

	the P12 beamline of EMBL Hamburg C. Blanchet (EMBL Hamburg, DE)
11:40 MS1-05	Structural insight into host cell surface retention of a 1.5-MDa bacterial ice-binding adhesin S. Guo (Queen's University, Kingston, CA)
	Focus Area 5 (SIG 6, 8, 9)
10:00 - 12:00	MS 41 The use of X-ray, electron and neutron scattering in nanoscience
	Chairs: J. Stangl (Johannes Kepler University, Linz, AT) C. Lehmann (Max Planck Institut für Kohlenforschung, Mülheim, DE)
10:00 MS41-01	Complementarity of TEM to bulk diffraction techniques for structures at nanoscale J. Hadermann (University of Antwerp, BE)
10:30 MS41-02	X-ray imaging of single nano-structures: from focused beams to coherent imaging and ptychography V. Favre-Nicolin (ESRF-The European Synchrotron, Grenoble, FR)
11:00 MS41-03	Twin domain mapping in topological insulator Bi ₂ X ₃ (X=Se,Te) by scanning XRD and electron backscattering diffraction D. Kriegner (Charles University in Prague, Faculty of Mathematics and Physics, CZ)
11:20 MS41-04	Investigation of layered and porous nanomaterials by diffraction tomography, simulations and HRTEM Y. Krysiak (Institute of Inorganic Chemistry and Analytical Chemistry, Johannes Gutenberg University, Mainz, DE)
11:40 MS41-05	Strain mapping in Ge microstructures using X-ray white beam Laue microdiffraction S. Tardif (CEA-INAC, FR)
10.00 12.00	Focus Area 2 (SIG 5, 11, 12) Osaka
10:00 – 12:00	MS 17 Minerals, materials and polymorphs Chairs: H. Hope (University of Oslo, NO) E. Nauha (University of Lincoln, UK)
10:00 MS17-O1	Understanding the polymorphic phase transitions of linear amino acids using <i>in situ</i>

characterisation

Radboud University, NL)

M. Smets (Institute for Molecules and Materials,

Scientific Programme - Thursday, 1 September 2016

14:30 **MS29-02**

15:00 **MS29-03**

15:20 MS29-O4 Insights into molecular spreading and bridging

	structure of SpoOJ and par YJ. Sun (National Tsing Hua University, Institute of Bioinformatics and Structural Biology, TW)
15:40 MS29-O5	Crystal-Packing and Spin-CrossOver in some Molecular Solids. Trends and new Features. P. Guionneau (CNRS, Univ. Bordeaux, Pessac, FR)
	Focus Area 3 (SIG 2, 3, 4) Darwin
14:00 - 16:00	MS 24 Inorganic and metal-organic magnetic
	structures
	Chairs: G. Eickerling (University of Augsburg, DE) D. Schaniel (CRM2 Université de Lorraine Nancy, FR)
14:00 MS24-01	Elucidating the magnetic behaviour of a unique linear Fe(I)-complex using the electron density J. Overgaard (Department of Chemistry, Aarhus University, DK)
14:30 MS24-02	Spin, charge and momentum densities of YTiO ₃ perovskyte M. Souhassou (CRM2 Université de Lorraine Nanc,
45.00 11001.00	FR)
15:00 MS24-03	New antiferromagnets [CuX(pyz) ₂](BF ₄) with X = Cl and Br. M. Kubus (Laboratory for Neutron Scattering and Imaging, Paul Scherrer Institute, Villigen, CH)
15:20 MS24-04	Structural and magnetic properties of the low dimensional fluoride β-FeF ₃ .3H ₂ O <i>S. Prugovecki (PANalytical B.V., NL)</i>
15:40 MS24-05	Synthesis and Characterization of Asymmertric Tetranuclear Nickel Chains without Disordered Ligand Phenomenon in Crystallography LH. Tsou (Department of Chemistry, National Taiwan University, Taipei, TW)
	Focus Area 2 (SIG 5, 11, 12) Rio
14:00 - 16:00	MS 16 Structure-property relationships
	in high pressure crystallography
	Chairs: A. Grzechnik (RWTH Aachen University, DE) P. Attfield (University of Edinburgh, UK)
14:00 MS16-O1	The large-volume press at ID06 of the ESRF for structure-properties research at extreme conditions W. Crichton (ESRF, FR)
14:30 MS16-O2	New chemistry of hydrogen-rich systems uncovered with the help of extreme conditions Y. Filinchuk (Université Catholique de Louvain, BE)

15:00	MS16-03	New coordination chemistry and properties revealed by high pressure crystallography A. Blake (University of Nottingham, UK)	
15:20	MS16-04	Pressure-Tuning of Guest Species and Magnetic Response in Mn- and Fe-based Formate Frameworks S. McKellar (EaStCHEM School of Chemistry and	
		the Centre for Science at Extreme Conditions, University of Edinburgh, UK)	
15:40	MS16-05	Structural basis for sensitivity to molecular oxygen of oxidases and fluorescent proteins investigated by high pressure crystallography B. Lafumat (European Synchrotron Radiation Facility (ESRF), FR)	
		Focus Area 5 (SIG 6, 8, 9)	ка
14:00	- 16:00	MS 40 New detectors for high energy	
		x-ray applications	
		Chairs: H. Graafsma (DESY Photon Science, Hamburg, DE) L. Strüder (PNSensor GmbH, Munich, DE)	
14:00	MS40-01	Hard X-ray photon counting with "LAMBDA" high-Z detectors D. Pennicard (DESY, DE)	
14:30	MS40-02	White beam Laue diffraction of polycrystalline materials using 3D energy dispersive detector (pnCCD)	
		U. Pietsch (University of Siegen, Department of Physics, DE)	
15:00	MS40-03	High-resolution XRD investigation of SiGe/Si heterostructures for novel X-ray detectors <i>I. Marozau (CSEM SA, CH)</i>	
15:20	MS40-04	PILATUS3 R CdTe large-area detectors for laboratory applications M. Müller (DECTRIS Ltd., CH)	
15:40	MS40-05	Modern CPAD Detector Technology for Higher Energy X-rays	

H. Ott (Bruker AXS GmbH, Karlsruhe, DE)

Scientific Programme - Thursday, 1 September 2016

Samarkand

General Microsymposia

14:00 – 16:00	MS 50 History of ECA, history of crystallography: contributions to and of crystallography
	Chairs: M. Kaftory (Technion Israel Institute of Technology, Haifa, IL) P. Paufler (Saxon Academy of Sciences in Leipzig, Dresden, DE)
14:00 MS50-01	History of crystallography in Switzerland D. Schwarzenbach (École Polytechnique Fédérale, Lausanne, CH)
14:30 MS50-O2	Crystallography in the Courtroom J. Bernstein (New York University Abu Dhabi, AE)
15:00 MS50-03	Absolute structure H. Flack (University of Geneva, CH)
15:20 MS50-04	History of Direct Methods: a personal account D. Viterbo (Università del Piemonte Orientale, DISIT, Alessandria, IT)
15:40 MS50-05	The Artwork of Maurits C. Escher and Crystallography H. Schenk (University of Amsterdam, NL)
16:00 - 16:30	Coffee break
	Sydney
16:30 - 17:30	Keynote Lecture Marek Grzelczak
	Chair: HB. Bürgi (Zurich, CH)
	Self-assembly of nanoparticles through hydrophobic interactions M. Grzelczak (CIC biomaGUNE, San Sebastian, Ikerbasque, Basque Foundation for Science, ES)
	hydrophobic interactions M. Grzelczak (CIC biomaGUNE, San Sebastian, Ikerbasque, Basque Foundation for Science, ES) Singapore
16:30 - 17:30	hydrophobic interactions M. Grzelczak (CIC biomaGUNE, San Sebastian, Ikerbasque, Basque Foundation for Science, ES) Singapore Keynote Lecture Martin Schmidt
16:30 – 17:30	hydrophobic interactions M. Grzelczak (CIC biomaGUNE, San Sebastian, Ikerbasque, Basque Foundation for Science, ES) Singapore Keynote Lecture Martin Schmidt Chair: A. Neels (Dübendorf, CH)

ECM Closing Ceremony and Poster Prizes

Chairs: K. M. Fromm (Fribourg, CH)
P. Macchi (Berne, CH)

Scientific Programme - Thursday, 1 September 2016

Award ceremony of the poster prizes at ECM-30

Invitation to ECS-4

J. Lipkowski (Warsaw, PL)

18:30 - 19:30

Invitation to the ECM-31 S. Garcia-Granda (Oviedo, ES)

3. Garcia-Granda (Oviedo, Ed)

Closing words of the ECM-30 K. M. Fromm (Fribourg, CH)

P. Macchi (Berne, CH)

A. Bacchi (Parma, IT)

Crystallographic Software Fayre

At the 30th European Crystallographic Meeting in Basel there will be again a Software Fayre, where authors of academic and/or open-source software can present their new developments. The Software Fayre will be held from Monday, 29 August 2016 until Thursday, 1 September 2016 during the lunch break hours (12:00 – 14:00). It will be in lecture room Darwin at the Congress Center Basel.

During the Tutorial Sessions, authors will demonstrate the features of their software on one or more practical examples.

Organiser: Martin Lutz (m.lutz@uu.nl)

Venue: Congress Center Basel, Room Darwin

Programme

Monday, 29 August 2016		Software Fayre	
12:30 – 13:00	Tutorial Session "Charge density refinement and in contacts analysis with MoProSuite (Christian Jelsch)		
13:00 – 13:30	Tutorial Session "Disordered Structure Refinement (Daniel Kratzert)	DSR"	

Tuesday, 30	August 2016	Software Fayre
12:30 – 13:00	Tutorial Session "HKL2MAP" (Fabio Dall'Antonia)	
13:00 – 13:30	Tutorial Session "SUNBIM: a package for X-ray ir and biomaterials using SAXS, W. GIWAXS techniques" (Dritan Siliqi)	
13:30 – 14:00	Tutorial Session "Topological analysis with Toposl (Eugeny Alexandrov)	Pro"

Wednesday, 31 August 2016		Software Fayre
13:00 – 13:30	Tutorial Session "MrBUMP" (Dan Rigden)	
13:30 – 14:00	Tutorial Session "AMPLE" (Dan Rigden)	

Special Meetings

Thursday, 1 S	September 2016	Software Fayre
12:00 – 12:30	Tutorial Session "Eval15" (Martin Lutz)	
12:30 – 13:00	Tutorial Session "CrystFEL" (Thomas White)	
13:00 – 13:30	Tutorial Session "OnDA (Online Data Analysis)" (Valerio Mariani)	
13:30 – 14:00	Tutorial Session "ARCIMBOLDO" (Claudia Millan Nebot)

Instructions for poster presentations

All information about the poster exhibition is available at the poster desk on-site.

Participants can apply for the following poster prizes. Application is done simply by hanging sticker(s) of the desired poster prize(s) above your poster. Stickers will be provided at the poster desk on-site.

The ECA will establish a panel of independent judges who will assess the posters, and the poster prizes will be presented at the ECM-30 Closing Ceremony on Thursday, 1 September 2016 at 18:30 in lecture room Sydney.

1. Protein Data Bank in Europe Poster Prize

The best poster submitted by a student and describing macromolecular structure.

2. RCSB Protein Data Bank Poster Prize

The best student poster related to macromolecular crystallography.

3. 3 CCDC Poster Prizes for Younger Scientists

Original research in the field of chemical crystallography or the application of crystallographic information to structural chemistry. This definition shall include advances in instrumental, experimental, theoretical or computational techniques that contribute to this field. Candidates for CCDC Poster Prizes shall not be more than 35 years of age on 1st January of the year in which the Meeting is held, and should normally be the first named author on the poster.

4. SIG 4 Electron Crystallography Poster Prize sponsored by Calidris

Poster about Electron Crystallography.

5. SIG 4 Electron Crystallography Poster Prize sponsored by NanoMEGAS

Poster about Electron Crystallography.

6. SIG 6 Jacek Grochowski Poster Prize sponsored by SRS Daresbury Laboratory and the University of Manchester

This Prize is given in memory of Professor Jacek Grochowski who was greatly involved in SIG 6 and in ECA and is open to all relevant contributions in the domains of instrumentation and experimental techniques.

7. IUCr Journals Poster Prizes

The IUCr Executive Committee is pleased to continue the series of IUCr Journals awards to be presented at meetings of the Regional Associates. A prize will be awarded to the best poster from a graduate or undergraduate student in each of the following three categories: structural biology, chemistry and applied crystallography, and will consist of an IUCr Journals open-access voucher, a copy of A Little Dictionary of Crystallography and a certificate.

8. Oxford Cryosystems Low Temperature Prize

Any crystallographic study with an emphasis on temperature effects.

9. FEBS Journal Poster Prize

Crystallography in Biochemistry

10. Structural Dynamics Poster Prize sponsored by The AIP Publishing/ACA Journal Structural Dynamics

For excellence in research on dynamics of molecular, protein and materials structure, enabled by the emerging new instruments (e.g. XFELs, electron sources, etc.) and new experimental and theoretical methodologies. It is open to students (graduate and undergraduate) and post-docs.

11. Garland Science Poster Prize

Poster must display electron density as primary evidence for any ligand or part of the structure discussed and important for the story.

12. Swiss Crystallographic Association Poster Prizes for Young Scientists

The Swiss Society of Crystallography is pleased to announce 5 prizes for the best posters presented at ECM-30. Applications from all poster presenters are welcome, in particular from younger scientists.

13. SIG12 Poster Prize "Crystallography of Functional Materials" sponsored by STOE & Cie. GmbH (Darmstadt, Germany)

Any student before completing a PhD.

Opening Ceremony & Welcome Reception

The Opening Ceremony will be held on Sunday, 28 August 2016 from 17:00 until 19:00 in lecture room Sydney in the Congress Center Basel, followed by a Welcome Reception.

Young Crystallographers Mixer

The Young Crystallographers Mixer for students will be held on Monday, 29 August 2016 from 20:30 onwards at the Bar Rouge. Pre-registration is required.

The Mixer is open to delegates who qualify for membership of the European Young Crystallographers Group. This includes not only students but postdoctoral fellows and other younger scientists up to an age limit of 35 years. 1 free drink per participant, snacks and DJ entertainment will be provided.

Address: Bar Rouge, Messeplatz 10, Basel, Switzerland

Science Slam and Bertaut Prize Ceremony

The first ever ECM-Science Slam will be held on Tuesday, 30 August at 19:00 in lecture room Sydney where 5-6 participants will present their research in an entertaining 3-minutes talk. The Bertaut Prize Ceremony will take place immediately afterwards in the same room.

ECM-30 Conference Dinner

The official ECM-30 Conference Dinner will take place on Wednesday, 31 August 2016 from 19:00 onwards at Switzerland's oldest and largest zoo. Basel Zoo has been mentioned by the Forbes magazine in 2015 as one of the best zoos worldwide with regards to contribution to wildlife.

Before the dinner (from 18:00 – 19:00), you have the possibility to join one of the tours through the different areas of the zoo (vivarium, etosha house, bird's house, monkeys etc.). The dinner will take place in the recently renovated restaurant of the Basel Zoo, in the middle of the animal compounds, with view on different animal compounds.

Address: Zoo Basel, Binningerstrasse 40, Basel, Switzerland Phone: +41 58 206 28 20 (Congress Secretariat)

Tram line 10, tram stop "Zoo"

Last trams back to Messeplatz: 23:12 / 23:27 / 23:57

Registration: Pre-registration is required

Fee: CHF 90.- per person

Tours story of pharma industry in Basel

Roche

Monday, 29 August 2016, 14:00 - approx. 15:30 Tuesday, 30 August 2016, 10:00 - approx. 11:30 Wednesday, 31 August 2016, 14:00 - approx. 15:30

The tour at the Roche site gives an insight into the history of the company, the main drug molecules discovered and developed. In addition a number of buildings at the campus are visited and architectural aspects as well as future site development plans.

Registration: Pre-registration is required

Fee: Free of charge (included in congress registration) Meeting Point: Main Entry Roche Campus, Grenzacherstrasse 214,

Bau 74. Basel. Switzerland

Novartis

Tuesday, 30 August 2016, 15:50 - approx. 18:15

The new Novartis Campus, a place of knowledge, innovation and encounter. First-class architecture and outstanding design are creating a modern and highly original workplace in the heart of the city. The tour will give you a first impression.

Pre-registration is required Registration:

Fee: Free of charge (included in congress registration) Meeting Point: Main Entry Novartis Campus, Fabrikstrasse 2,

Main Entrance, Basel, Switzerland

Historical evening walk through Basel

Tuesday, 30 August 2016, 19:30 - approx. 21:00

You will follow on the traces of the famous Basel mathematicians, Euler and Bernoulli. This non-traditional historic tour through Basel will lead you to places which are not necessarily found in the classical city guides, and you will learn about Basel of the 18th century.

Registration: Pre-registration is required

Fee: Free of charge (included in congress registration)

Meeting Point: Münsterplatz, Basel, Switzerland

For detailed instructions how to get there please contact

the secretariat on-site.

Visit of Free Electron Laser SwissFEL

Excursion to the construction site of the SwissFEL. The Paul Scherrer Institute is constructing a new scientific large-scale facility - the SwissFEL X-ray free-electron laser. This will provide new opportunities for cutting-edge Swiss research. The SwissFEL is scheduled to go into operation at the end of 2016.

Number of participants is limited to 90 and they will be accepted on a first-come-first-served basis. Applicants are kindly asked to book their own accommodation in Basel. Registration fee does not include lunch at the PSI.

Preliminary programme of the excursion:

09:00	Departure from Basel by bus (see plan below)
10:15 - 10:30	Arrival at PSI (Educational Center OSGA)
10 00 10 50	14/1 (0004)

10:30 – 10:50 Welcome address (OSGA) 10:50 - 13:00 Excursions on the SwissFEL site

13:00 - 14:00 Lunch at the OASE restaurant (self-service, not included)

14:00 - 14:20 Possibility to attend the PSI visitors' center PSI-Forum

14:30 Departure of the bus back to Basel

~ 16:00 Arrival to Basel

Abstract Publication

All accepted abstracts (incl. Late Breaking abstracts) are published on the ECM-30 website and online in the journal *Acta Crystallographica Section A*.

ATM

An ATM Is located outside the Congress Center on the left hand of the main entrance. VISA and MasterCard are accepted.

Badges

Access to all scientific sessions is only possible with your personal badge. Please always wear your badge! CHF 30.- will be charged for replacement of a lost badge.

Cloakroom

A cloakroom is available on the ground floor during the secretariat opening hours and can be used free of charge. Please note that the cloakroom is unguarded and on your own risk. The Congress Center Basel / Messe Schweiz does not take any responsibilities for lost items.

Coffee & Lunch Breaks

Lunch is served between 12:00-13:00 in the exhibition area on the 2^{nd} floor from Monday – Thursday free of charge. Coffee is available from Monday to Thursday in the mornings from 09:30-10:00 and in the afternoons from 16:00-16:30.

Exhibition (Foyer CCB, 2nd floor) Opening Hours

Sunday, 28 August 2016	17:00 - 21:00
Monday, 29 August 2016	08:00 - 19:00
Tuesday, 30 August 2016	08:00 - 19:00
Wednesday, 31 August 2016	08:00 - 18:45
Thursday, 1 September 2016	08:00 - 19:00

Insurance

The meeting organizer cannot accept liability for personal injuries sustained, or for loss or damage of property, either during, or as a result of the meeting. Please check the validity of your insurance.

Internet Corner

Internet terminals are located in the exhibition area and are available to all congress participants during the opening hours of the exhibition. An attendee list (names and provenance) can be viewed at the internet terminals.

Parking

Parking Messe Basel, Riehenstr. (open 24 hours), CHF 50/day (use public transportation instead). No tickets are sold at the secretariat.

Registration / Secretariat Opening Hours

General Information

Sunday, 28 August 2016 16:00 – 19:30 Monday, 29 August 2016 07:30 – 18:00 Tuesday, 30 August 2016 08:00 – 19:30 Wednesday, 31 August 2016 08:00 – 18:45 Thursday, 1 September 2016 08:00 – 19:30

Responsibility

The participant acknowledges that she / he has no right to lodge damage claims against the organisers should the holding of the congress be hindered or prevented by unexpected political or economical events or generally by "force majeure", or should the non-appearance of speakers or other reasons necessitate programme changes. With her / his registration, the participant accepts this proviso.

Speakers Service Centre (SSC)

The SSC is located close to all lecture halls. All speakers are kindly asked to hand in their PowerPoint presentation at the SSC at least 1 hour before the start of the session.

Venue

The conference takes place at the Congress Center Basel.

Messeplatz 21 4058 Basel / Switzerland Phone: +41 58 206 28 20

WLAN

Free wireless-LAN is available throughout the whole congress center.
